REPORT NO.

INFO.

THIS DOCUMENT CONTAINS INFORMATION AFFECTING THE NATIONAL DEFENSE OF THE UNITED STATES WITHIN THE MEANING OF TITLE 18, SECTIONS 793 AND 794, OF THE U. S. CODE, AS AMENDED. ITS TRANSMISSION OR REVELATION OF ITS CONTENTS TO OR RECEIPT BY AN UNAUTHORIZED PERSON IS PROHIBITED BY LAW. THE REPRODUCTION OF THIS FORM IS PROHIBITED.

THIS IS UNEVALUATED INFORMATION

1. Plant No 31 in Uglich (57°32' N/38°17' E), Kalinin Oblast, is located in the northern sector of the town, east of the main road to Rybinsk. A sign with the lettering "Zavod 31" was seen at the main building of the plant. \*
2. The plant consisted of a five-story building, 25x120 meters, which housed the laboratories, the grinding departments including the ruby section, and the department for the production of watch jewels, the carpentry shop, where shipping boxes were manufactured, and a store room. A new building 120 meters long but narrower than the main building was constructed in 1947/1948. Details on the purpose of this structure were not available. The foundation walls of a third building were seen in March 1948. \*\*
3. Semi-precious stones were cut and processed at the plant.

\* Comment. On the basis of a rough sketch, which was not forwarded, the plant was entered as item 4 in the attached aerial photograph dating from World War II. The designation of the installation as Plant No 31 is reported for the first time. The plant's numerical designation was previously reported as being No 837. Although a sign lettered "Plant No 31" may actually have been seen this is not proof that this numerical designation is still valid.

\* Comment: For layout of plant, see Annex 2. This sketch was obtained earlier and does not show the new buildings of the present report. The data on the layout of the plant agree with an earlier report.

- 2 Annexes:
- (1) Aerial Photograph
  - (2) Layout Sketch of Semi-Precious Stones Plant in Uglich
